Summary

Backend engineer with **3 years at Rokomari**, Bangladesh's largest e-commerce platform. I plan, design, build and review backend features across six business modules, with a focus on data integrity, fast queries and reliable background jobs.

Experience

Rokomari.com Dhaka, Bangladesh
Jr. Software Engineer, Backend *Nov 2023 – Present*

Technical Planning & System Design

- **Planning & design:** planned and led the RabbitMQ 4.x migration, the Liquibase adoption and a staged MySQL index rollout with a measurement plan; documented business logic for the engineering team.
- **Team practices:** wrote a team playbook for Liquibase, unit testing and Playwright; reviewed teammates' code.

Performance & Reliability

- **RabbitMQ:** moved consumers to manual acknowledgement with dead-letter queues and retry; added missing queues and a single-active consumer for pre-orders; removed deprecated queues and duplicate consumers.
- **Background jobs:** rescheduled and reworked cron jobs so they fetch and save in bounded batches.
- **Database:** split read and write queries; replaced heavy updates with capped statements; fixed lock-wait timeouts on order placement.
- **Ledgers:** sped up ledger saves with batched SQL; built tools and batch migrations that fix ledger mismatches.
- **Client & admin site:** fixed storefront slowness caused by order merges; rebuilt heavy dashboards and reports on optimized SQL; added pagination and bulk Excel export.

Business Modules

- **Accounts:** supplier, corporate and courier ledgers; corporate payments, refunds and wallet; monthly sales reports.
- **Purchase:** supplier payment vouchers with bank-transfer automation, primary-supplier change and daily purchase summaries.
- **Courier & Inventory:** RedX and Steadfast courier integrations, courier operations and performance reporting; inventory transfer and stock-quantity fixes.
- **Branding & Marketing:** Facebook Conversion API, Meta Pixel, campaign offers, discounts and delivery-charge promotions.
- **Customer Care:** order handling, payment-method control and order returns in the customer care tools.
- **Quality:** Playwright end-to-end tests and JUnit/Mockito unit tests; fixed XSS and CSRF issues.

Brain Station 23 Dhaka, Bangladesh
Industrial Attachment / Academic Internship *Nov 2022 – Dec 2022*

Technical Skills

Languages: Java, SQL, C/C++, JavaScript, TypeScript, HTML, CSS
Backend: Spring MVC, Spring Security, Spring Boot, Hibernate, REST APIs, JWT, Node.js, Express
Data & Messaging: MySQL (query tuning, indexing), MongoDB, Redis, EHCache, RabbitMQ, Liquibase
Frontend: JSP, jQuery, React, Next.js, Tailwind CSS, Bootstrap, Webpack
Testing & Tools: Playwright, JUnit, Mockito, Git, GitLab CI/CD, Docker, Maven, Linux, AWS S3

Education

Dhaka University of Engineering & Technology (DUET) Gazipur, Bangladesh
BSc in Computer Science and Engineering, CGPA 3.08 *Mar 2019 – Jun 2023*

Competitive Programming & Leadership

- **ICPC Asia West Continent Finalist 2021**, the 19th team from Bangladesh • **Champion**, Intra-DUET Contest 2021.
- **ICPC Dhaka Regional:** 40th/165 (2021), 86th/110 (2020), 130th/190 (2019).
- 2,200+ problems solved • Codeforces max **1383** • LeetCode max **1741** • CodeChef max **1651**.
- **Vice President and General Secretary**, DUET Computer Society (2021–2023); organized the Intra-DUET Programming Contest 2022–23.
